## PROFILE

B.Tech Artificial Intelligence & Machine Learning student with a strong foundation in Python, Machine Learning and software development. Skilled in building projects that apply AI concepts to real-world problems such as fake news detection, image classification and smart expense tracking. Eager to apply technical skills, collaborate in team environments, and gain hands-on experience through an internship.

---

## EXPERIENCE & PROJECTS

### FAKE NEWS DETECTION USING MACHINE LEARNING | PYTHON, NLP, ML

- Built an ML model to classify news as real or fake using NLP techniques and Scikit-Learn.
- Performed data cleaning, preprocessing, TF-IDF vectorization, model training & evaluation.
- Achieved ~90% accuracy; improved understanding of model tuning and performance metrics.
- Research paper prepared as a college research project (currently under review for publication).
- GitHub: <https://github.com/aishwaryazinjurtee/Fake-News-Detector>

### MULTI-LABEL CLOTHING STYLE CLASSIFICATION USING ATTENTION-ENHANCED EFFICIENTNET | DEEP LEARNING, CV

- Implemented image classification to identify multiple clothing styles using EfficientNet with Attention mechanism.
- Modulated model architecture to enhance image feature extraction and multi-label accuracy.
- Improved understanding of computer vision, CNNs, transfer learning, and model evaluation.
- GitHub: <https://github.com/aishwaryazinjurtee/Clothing-Style-Classification>

### SMARTJEB – AI-ASSISTED EXPENSE TRACKING APPLICATION | PYTHON, FULL-STACK

- Collaborated with peer (Gaurav Guddeti) to build a smart expense tracking system with AI insights.
- Designed and developed core modules including authentication, data management, and user experience flow.
- Focused on clean UI, security and practical real-world usability to support financial awareness.

### STUDENT PERFORMANCE SCORE PREDICTOR | PYTHON, ML

- Implemented a simple regression model to predict student scores based on study hours.
- Understood how data selection impacts model accuracy and learning patterns in ML.

### PERSONAL TO-DO/TASK MANAGER | PYTHON

- Developed a basic CLI-based task manager to practice logic building and modular coding.
- 

## EDUCATION

B.Tech – Artificial Intelligence & Machine Learning  
Vishwakarma University, Pune  
(3rd Year – Ongoing) (2027)  
CGPA: 7.64

---

## SKILLS & ABILITIES

**Programming:** Python, C, C++

**AI/ML & Data:** Scikit-Learn, TensorFlow (Basic), Keras (Basic), Pandas, NumPy, Matplotlib

**Development:** HTML, CSS, JavaScript, React (Basic)

**Database:** SQL, MySQL

**Tools:** Git, GitHub, VS Code, Jupyter Notebook

**Core Knowledge:** Model Training, Data Preprocessing, ML Concepts, Problem-Solving

---

## CERTIFICATIONS

· IBM – Full Stack Software Development (Coursera)

<https://coursera.org/share/1f7db3948d73efdcf993116227cb49ed>

· Microsoft – Introduction to C#

<https://coursera.org/share/92da80936b5323936cabbe1c4a107219>

· Frontend Development using React

<https://coursera.org/share/b00c6a4753fde456fc390e0c5be2dd2b>

---

## EXTRACURRICULARS

· Active participant in dance and cultural events.

· Team-oriented, collaborative, and enjoy helping peers.

---

## LANGUAGES

English, Hindi, Marathi
